INTERIM FINANCIAL REPORT JUNE 30, 2010

# entrepreneurship erai **Ves**1 Γ, C $\mathbf{P}$ **|-**, | nership,transfer ess sustainable p D, employee shareholder cooperatives

### The interim Financial Report includes:

- > Management Discussion and Analysis
- > Management's Report
- Complete audited financial statements, including the notes and the Auditors' Report
- > Schedule of cost of investments impacting the Québec economy
- > Statement of other investments
- > Index of the Company's share in investments made by specialized funds and partner funds, at cost

# **Management Discussion and Analysis**

This interim Management Discussion and Analysis ("MD&A") supplements the financial statements and contains financial highlights but does not reproduce the Company's interim financial statements. It presents management's assessment of the Company's results for the period reported in the financial statements, as well as its financial position and any material changes to it.

This disclosure document contains management's analysis of forward-looking statements. Caution should be exercised in the interpretation of this analysis and these statements since management often makes reference to objectives and strategies that contain risks and uncertainties. Due to the nature of the Company's operations, the associated risks and uncertainties could cause actual results to differ from those anticipated in forward-looking statements. The Company disclaims any intention or obligation to update or revise such statements based on any new information or new event that may occur.

Copies of the interim financial statements may be obtained free of charge, on request, by calling 514 281-2322 or (toll free) 1866 866-7000, extension 2322, by writing to 2 Complexe Desjardins, P.O. Box 760, Desjardins Station, Montréal, Québec H5B 1B8, or from our website at www.capitalregional.com or the SEDAR website at www.sedar.com.

Annual financial information may be obtained in the same way.

# **Financial highlights**

The following charts present key financial data and are intended to assist in understanding the Company's financial results for the preceding five fiscal years and for the six-month period ended June 30, 2010. This information is derived from the Company's audited annual and interim financial statements.

# Overview

The Company closed the first half of fiscal 2010 with net income of \$7.0 million (\$6.9 million for the same period in 2009), representing a non-annualized return of 0.8%, (0.8% as at June 30, 2009). Based on the number of shares outstanding, this brings net assets per share to \$9.80 as at June 30, 2010 compared with \$9.73 at the end of fiscal 2009. For information purposes, at the price of \$9.80, shareholders who invested seven years earlier obtain an annual after-tax return of between 8.8% and 9.4% taking into account their income tax credit of 50%.

The Company's return is mainly attributable to the contribution of Investments impacting the Québec economy and Other investments. Assets allocated to Investments impacting the Québec economy are focused on the Company's mission of promoting the economic development of Québec cooperatives and regions. Assets are allocated across four lines of business and consist mainly of equities and debentures. Investments impacting the Québec economy posted a non-annualized return of 2.6% for the six-month period ended June 30, 2010 compared with a non-annualized return of 1.6% for the same period a year earlier. Most business lines contributed to the results, in particular the Company Buyouts and Major Investments asset classes, spurred by the more favourable economic conditions in the first six months of 2010. The cost of Investments impacting the Québec economy made or committed totalled \$497.5 million, of which \$439.6 million were disbursed.

Other investments represents the balance of funds not invested in partner companies. This portfolio was established to provide security for the Company's returns and ensure the necessary liquidity to fund share redemptions and investments. It consists primarily of bonds and preferred shares. Other investments generated a non-annualized return of 2.3% for the first six months of 2010 compared with a return of 3.1% for the same period of 2009. These returns are due mainly to scaled back market expectations for interest rates increases.

Capital subscriptions during the first half of the year reached \$109.7 million, and share redemptions totalled \$55.0 million. Since the time a portion of shares first became eligible for redemption at the end of the minimum seven-year holding period, approximately 39% of eligible shares have been redeemed. Net assets as at June 30, 2010 stood at \$967.7 million, up 6.8% from December 31, 2009. The number of shareholders was 112,113 as at June 30, 2010, a slight drop of 5% from December 31, 2009.

# **Economic background**

#### Looking back on the first six months of 2010

Robust economic growth, particularly in the emerging countries and North America, started 2010 off on an encouraging note. Investors appeared to have fully regained their confidence and North American stock markets showed good performances. As spring progressed, the problem of public finances in certain countries, primarily in southern Europe, rapidly rekindled the spectre of another international financial crisis, and doubts about the strength of the world recovery clouded skies once again.

Despite the disruptions caused by the crisis in some European countries, in the United States the economy continued to grow. Consumer spending strengthened on income tax cutbacks and increased government transfers. The real estate market regained some turf, spurred by the home-buyer tax credit program. Events in Europe did not unduly affect U.S. economic activity given that trade between the two regions is less substantial. That being said, falling oil prices, bond rates that followed suit and a Federal Reserve rate held at 0.25% all favoured economic activity. Private sector job creation, however, remained anemic, which put the reins on consumer confidence.

In Canada, domestic demand drove real GDP growth to 6.1% in the first three months of 2010. Consumer and government spending along with real estate investment were buoyed by low interest rates, strong job creation and ongoing stimulus packages. The loonie moved in a range between US\$0.93 to slightly over par during the first six months of 2010, subject to changes in the price of raw materials such as oil, Canadian economic growth and the greenback, which was bolstered by its safe haven status during the crisis in Europe.

Since summer 2009, Canada has enjoyed the strongest economic growth of the G7 countries. Against that backdrop, it was no surprise that the Bank of Canada on June 1, 2010 became the group's first central bank to announce a 0.25% increase in its key rates. Canadian federal bonds strengthened on the turbulence of the first six months of 2010. Bonds with a slightly higher degree of risk were less favoured, leading credit spreads to dip somewhat for provincial and corporate issues.

Compared with many other provinces, Québec – which suffered less through the recession – saw a less spectacular recovery but, contrary to Canada and the United States, has already won back all the production and job losses it suffered during the recession. Québec has now entered an expansion phase that will continue over the coming quarters.

#### 2010 outlook

There is little doubt as to the solid footing of the current economic recovery in the United States, but hopes that it will continue at the same pace are relatively slender. Weakness in job creation, the removal of major stimulus programs and a strong greenback that will hurt exports will slow economic growth and postpone interest rate hikes until 2011. Canadian economic performance will also be slowed in the second half of the year by the disappearance of a number of temporary factors that have driven the housing market, by Bank of Canada hikes in key interest rates, by reduced government growth stimuli and by an exchange rate that will once again rise above par with the greenback. The gradual rise in oil prices to around US\$88 a barrel by the end of the year and growing interest rate spreads between Canada and the United States will benefit the loonie. International exports will be hard pressed to get back on their feet in the short run, especially since demand from our main trading partner is slow to firm up.

Québec will face the same dampers as Canada, but the expansion phase will continue. Improvement in the job market is on solid ground and will continue to support consumer spending. Businesses should gradually begin to take the lead in non residential investment as governments start to slow the pace of public infrastructure upgrades.

Continued monetary tightening over the next few quarters could lead to short-term rate hikes for Canadian federal bonds. Increases in long-term rates would be more limited, given the influence of U.S. rates and international demand for Canadian assets. Credit spreads with provincial and corporate bonds should shrink gradually as risk aversion fades.

# The venture capital market in the first six months of 2010

On North American markets, the United States showed increased intensity over the last two quarters while in Canada investments grew 34% compared with the same period of 2009. Québec investments totalled some \$201 million, compared with \$218 million in 2009, representing 33% of all Canadian investments.

In most cases, financing in Québec has a tendency to be for smaller amounts, with the average standing at approximately \$1.8 million at the end of June, compared with \$2.4 million in March 2010.

Investments in the traditional sectors were trimmed back in favour of life sciences and other technologies, primarily due to three clean technology transactions in the first quarter. While information technologies witnessed a 50% pullback in amounts invested compared with the first six months of 2009, life sciences increased by 57%.

Over the first six months of 2010, tax-advantaged funds and foreign investors were the most active, representing 31% and 29% respectively of all investments, followed by independent private funds with 22%.

Expansion and later development stage transactions regained top place with investments of \$136 million, for 68% of the total. Startup and preliminary development stage deals nonetheless accounted for \$45 million, but are sharply down from the first six months of 2009 when investments reached \$90 million.

At the end of June, committed funds totalled some \$576 million, up slightly compared with June 2009. Since January 2010, Québec funds have made up 40% of total new commitments.

# Management's discussion of financial performance

On the initiative of Desjardins Group, Capital régional et coopératif Desjardins was founded on July 1, 2001 following adoption of the *Act constituting Capital régional et coopératif Desjardins* (the "Act") by Québec's National Assembly on June 21, 2001. Desjardins Venture Capital Inc. manages the Company's activities.

The Company aims to participate in a more prosperous Québec by providing ongoing support to companies and cooperatives and reflecting regional economic realities. It gives meaning to the cooperative spirit by supporting the continuity of companies and growing the collective wealth of the regions.

### Mission, objectives and strategies

The mission, objectives and strategies of the Company remain substantially the same as those described in its most recent annual MD&A.

Note that, effective January 1, 2010, the Company's manager consolidated its administrative teams, adopting a structure that optimizes its efficiency and control of management fees. As a result, it now allocates its Investments impacting the Québec economy activities across four lines of business, mainly by company size and asset class:

- > Development capital to consolidate regional activities such as the resource regions and cooperatives
- > Company Buyouts and Technological Innovations to cover major investments such as company buyouts and related employee-shareholder cooperatives, and investments in information technologies
- > Venture Capital Health to consolidate investments in life sciences managed in house and those managed by an external firm
- > Funds for all investment activities carried out through funds

### Risk management Risk governance

In keeping with the portfolio asset management approach, risks are managed globally, taking into account all of the Company's contractual commitments. In accordance with its Governance Policy, the Board of Directors is supported in its control and monitoring duties and responsibilities by the four following committees: the Executive Committee, the Audit Committee, the Financial Asset Management Committee and the Ethics and Professional Conduct Committee. Monitoring and control of the different risks faced by the Company is allocated across these committees, which regularly report on their activities to the Board of Directors and make the appropriate recommendations. The manager also carries out some of the Company's risk governance activities through its investment committees and Portfolio Valuation Committee, which report to the Board of Directors on a regular basis.

The roles and responsibilities of these committees remain substantially the same as those described in the most recent annual MD&A.

#### Note to the reader

The following sections regarding market risks, credit and counterparty risks and liquidity risks have been reviewed by the Company's auditor within the audit of the financial statements concerning which an auditors' report was issued on August 19, 2010.

#### Market risks

Market risks pertain to the Company's role in the capital markets and, indirectly, to general changes in economic conditions. They also pertain to the impact of capital market movements on the value of the Company's assets. The various market risks directly impacting the Company are listed below:

#### Interest rate risk

Interest rate fluctuations have a significant impact on the market value of fixed-income securities held in the portfolio for which fair value is determined based on market conditions. Fixed-income securities held in the Other investments portfolio include money market instruments, bonds and preferred shares with a total fair value of \$566.7 million (\$466.4 million as at December 31, 2009).

Money market instruments with a fair value of \$70.6 million (\$85.6 million as at December 31, 2009) are not valued based on fluctuations in interest rates due to their very short term maturity and the Company's intention to hold them to maturity.

Bonds net of obligations related to securities sold short with a fair value of \$473.5 million (\$361.1 million as at December 31, 2009) are directly affected by fluctuations in interest rates. A 1% increase in interest rates would have resulted in a decrease of \$13.9 million in net income, or a 1.4% decrease in the Company's share price as at June 30, 2010 (\$9.6 million or 1.1% as at December 31, 2009). Similarly, a 1% decrease in interest rates would have had the opposite effect, resulting in a \$14.6 million increase in net income, or a 1.5% increase in share price (\$10.0 million or 1.1% as at December 31, 2009). Given that the Company matches the maturities of bonds held in its portfolio with the average maturity of expected cash outflows, the long-term effect of interest rates on results should be limited.

Preferred shares with a fair value of \$22.6 million (\$19.7 million as at December 31, 2009) may also be affected by interest rate fluctuations. However, unlike bonds, there is no perfect correlation between interest rate fluctuations and changes in the fair value of preferred shares. Also, the interest rate risk related to preferred shares is low given the amounts in question. No interest rate risk is associated with securities purchased under resale agreements or with securities sold under repurchase agreements as their assignment or call prices are determined at the time of the initial transaction.

Cash bears interest at the average weighted rate of 0.46% (average weighted rate of 0.21% as at December 31, 2009). Accounts receivable and accounts payable and accrued liabilities do not bear interest.

#### Stock market risk

Stock market trends have a twofold impact on the Company. In addition to the direct impact on the market values of publicly traded stocks, the valuations of some private portfolio companies may also be affected by changes in stock prices.

As at June 30, 2010, the Investments impacting the Québec economy portfolio included four traded companies valued at \$4.7 million, representing 0.5% of net assets (five companies valued at \$3.6 million as at December 31, 2009, representing 0.4% of net assets). A 10% increase or decrease in the stock markets would have resulted in an increase or decrease in the Company's net income of \$0.4 million respectively (\$0.3 million as at December 31, 2009).

In accordance with the Company's global asset management approach, the overall impact of these interrelated risks is taken into account when determining overall asset allocation.

#### **Currency risk**

Changes in currency values have an impact on the activities of a number of the Company's partner businesses. The net effect of an appreciation in the Canadian dollar is not necessarily always negative for these companies, nor is a depreciation necessarily positive. However, rapid fluctuations in the Canadian dollar heighten the difficulties faced by these companies.

Currency fluctuations impact the fair value of investments valued initially in a foreign currency and subsequently translated into Canadian dollars at the prevailing rate of exchange. These investments, whose value varies in step with fluctuations in the value of a foreign currency, represent a fair value of \$60.9 million, or 6.3% of net assets as at June 30, 2010, compared with \$53.4 million, or 5.9% of net assets as at December 31, 2009.

In 2008, the Company adopted a policy for the systematic hedging of currency risk for investments valued in a foreign currency. A \$5 million line of credit was granted to the Company for its foreign exchange contract transactions. As at June 30, 2010, the Company held foreign exchange contracts under which it must deliver US\$56.6 million on September 30, 2010 at the rate of CAD/USD 1.06005.

This limits the Company's net exposure to foreign currencies to \$0.7 million (\$7.6 million as at December 31, 2009). Any fluctuation in the Canadian dollar against its U.S. counterpart will therefore not have a significant impact on the Company's results.

#### Credit and counterparty risks

In pursuing its mission of Investments impacting the Québec economy, the Company is exposed to credit risks related to the potential financial losses of partner companies. By diversifying its investments by sector, company development stage and financial instrument type and by limiting the potential risk of each partner company, the Company has limited portfolio volatility due to negative events.

The Company does not generally require guarantees to limit credit risk on its loans. Requiring guarantees would contravene the eligibility rules for Investments impacting the Québec economy.

In the first six months of 2010, the Company replaced its computerized rating system with Moody's RiskAnalyst. This new system enables a more objective assessment of credit risk, closer monitoring of high risk files and improved operational efficiency.

Investments are first ranked from 1 to 9 based on the criteria defined by the system. Companies with a ranking of 7 and above are reviewed on a monthly basis to spread them across ranks 7 to 12.

Ranked by risk, the breakdown of Investments impacting the Québec economy is as follows (fair value amounts):

			As at June 30, 2010	As at December 31, 2009
Rank 2010	Rank 2009		(in thousands of \$)	(in thousands of \$)
1 to 6.5	1 to 4	Low to higher than average risk	326,035	332,224
7 to 9	5	At risk	58,305	58,798
10 to 12	6 and 7	High risk and insolvent	20,742	10,299

Other investments portfolio risks are managed by diversification across numerous issuers with a credit rating of BBB from Standard & Poor's or DBRS or better. Counterparty risks arising from cash and repurchase/resale transactions are limited to the immediate short term. The concentration of the five largest Investments impacting the Québec economy and the five largest Other investments is as follows (percentages are based on fair asset value):

	J	As at une 30, 2010	Decer	As at nber 31, 2009
	% of asset class	% of net assets	% of asset class	% of net assets
Investments impacting the Québec economy	28.4	11.9	28.5	12.6
Other investments*	72.9	41.0	64.1	33.1

\* Government issuers accounted for 87.1% (86.4% as at December 31, 2009) of the five largest issuers or counterparties in the Other investments portfolio.

The portfolio summary presented at the end of this MD&A also provides relevant information for assessing credit concentration risk.

Counterparty risk is low for foreign exchange contracts given the amounts in question and that the contract counterparty is Caisse centrale Desjardins.

#### Liquidity risks

The Company must maintain sufficient liquid assets to fund share redemptions and committed Investments impacting the Québec economy. If it failed to do so, the Company would be dependent on the markets and could be forced to carry out transactions under unfavourable conditions. With liquid investments that must, once the Company's capitalization reaches maximum limits, represent 35% to 40% of assets under management and using a management approach that ensures that the average maturity of bonds matches the average maturity of expected outflows, the Company can confirm that liquidity risks are adequately covered.

#### **Operating results** *Net results and fund returns*

The Company ended the first half of the year on June 30, 2010 with net income of \$7.0 million, or a non-annualized return of 0.8% compared with net income of \$6.9 million, or a non-annualized return of 0.8%, for the same period in 2009.

The Company's asset allocation strategy allows it to enjoy a more balanced overall portfolio profile that limits volatility while actively carrying out its mission to contribute to the economic development of cooperatives and Québec's regions. This should limit the volatility of the Company's returns in periods of substantial market turbulence.

The Company's performance results primarily from Investments impacting the Québec economy and Other investments, which generated non-annualized contributions of 1.2% and 1.3% respectively in the first six months of 2010. Expenses, net of administrative charges, income taxes and capital tax made up the remainder of the Company's return with a negative contribution of 1.6%.

#### Investments impacting the Québec economy

Investments of \$32.5 million during the first half of 2010, sale proceeds of \$28.2 million and losses of \$1.5 million brought the total fair value of the Company's investment portfolio, including foreign exchange contracts, to \$404.8 million as at June 30, 2010 (\$402.0 million as at December 31, 2009).

The Company's manager has allocated its Investments impacting the Québec economy activities across four business lines. As part of its business development activities, the Company's manager focuses from time to time on different economic sectors or lines of business to ensure portfolio balance. In order to generate both short- and long-term returns for the Company's shareholders, the range of financial instruments used may also vary.

Portfolio diversification is determined by adding funds committed but not disbursed to investments at fair value. As at June 30, 2010 and December 31 of the past five fiscal years, the Investments impacting the Québec economy portfolio was allocated by line of business:

# Investments and funds committed but not disbursed at fair value by line of business 2005-2010 (in %)

Technological Innovations\*

🔲 Venture Capital - Health

E Funds

\* Given the varied profile of the Company Buyouts and Technological Innovations business line, the two asset classes that make it up are presented separately to better reflect the Company's activities. .

Investment activities should also be measured taking into account the change in funds committed but not disbursed, which amounted to \$57.9 million as at June 30, 2010, down \$6.0 million from December 31, 2009. New commitments for the six-month period ended June 30, 2010 totalled \$26.5 million compared with \$22.8 million for the same period of 2009. Investments of \$32.5 million in 2010 rounded out the factors behind this variance.

Total commitments at cost as at June 30, 2010, amounted to \$497.5 million in 232 companies, cooperatives and funds, of which \$439.6 million was disbursed to 226 companies, cooperative and funds within the portfolio.

#### Revenue generated by Investments impacting the Québec economy (in thousands of \$)

	Six months ended June 30, 2010	Six months ended June 30, 2009
Revenue	12,331	11,359
Gains (losses)	(1,524)	(5,420)
	10,807	5,939

Revenue consists of interest, dividends and negotiation fees related to Investments impacting the Québec economy. The increase in revenue was mainly attributable to the higher average debenture balance.

The Company accounts for its Investments impacting the Québec economy at fair value. Two comprehensive portfolio reviews are carried out each year, with one covering the six-month period ended June 30 and the other covering the six-month period ended December 31. As a result of the June 30, 2010 review, 62 investments were remeasured to reflect a \$1.5 million unrealized decline in value. The public companies held in the portfolio, of which the fair value based on market conditions totalled \$4.7 million as at June 30, 2010, caused a decrease in value of \$0.4 million during the first half of the year. For the same period, disposals and writeoffs of Investments impacting the Québec economy and foreign exchange contracts resulted in a realized loss of \$40.5 million and an unrealized gain of \$40.9 million, for a net upward impact on results of \$0.4 million.

As the overall effect, the Company recorded in its results for the six-month period realized and unrealized losses of \$1.5 million compared with a loss of \$5.4 million for the same period in 2009. The negative impact of these changes in the fair value of the Investments impacting the Québec economy portfolio on the Company's results is gradually declining, which indicates that the investment portfolio is more mature and its asset allocation is more balanced.

As at June 30, 2010, the overall risk level of the Investments impacting the Québec economy portfolio remained satisfactory and comparable to levels as at December 31, 2009.

#### Other investments

Managing the Other investments portfolio involves the portion of assets not earmarked for Investments impacting the Québec economy, including temporarily available cash resources prior to their investment in companies.

#### Breakdown of net assets as at June 30, 2010

As at June 30, 2010, the Company's Other investments portfolio, net of obligations related to securities sold short, including cash and securities purchased under resale agreements and securities sold under repurchase agreements but excluding foreign exchange contracts, totalled \$544.4 million compared with \$490.6 million as at December 31, 2009. These funds were invested mainly on fixed-income securities markets in highly liquid and low-credit risk instruments. As at June 30, 2010, nearly 75% of portfolio bonds were government-guaranteed. Other investments accounted for 56% of the portfolio's total net assets as at the end of the first six months of 2010, compared with 54% as at December 31, 2009. The excess of net subscriptions over net realized Investments impacting the Québec economy contributed to this increase. The Company anticipates that this ratio will continue to decrease in coming years and will gradually stabilize around 35% and 40% as capitalization reaches maximum limits and the pace of redemptions levels off. In keeping with its core mission, this will allow an increase in funds allocated to Investments impacting the Québec economy.

The Company maintained a cash position equal to 18.7% of the Other investments portfolio as at June 30, 2010 (22.2% as at December 31, 2009) to cover redemption requests by shareholders and Investments impacting the Québec economy it expects to make. This level of liquidity, which the Company is required to maintain in keeping with its sound management practices, limits the portfolio's overall potential return.

To enhance total portfolio returns, the Company's manager is also authorized to take market positions using purchase/ redemption transactions. Such trades are made in an overlay portfolio and their potential risk limits are defined and overseen by the Company's Financial Asset Management Committee and tracked daily by the Company's manager. This activity generated a gain of \$0.8 million for the first six months of 2010 (0.7\$ million for the same period in 2009). As at June 30, 2010, the Company's balance sheet showed \$6.3 million in securities purchased under resale agreements offset by an equal amount for obligations related to securities sold short. Also as at the same date, \$60.2 million in securities sold under repurchase agreements were recognized by the Company as liabilities and offset by bonds for an equal amount under Other investments.

The orderly liquidation of the fund of hedge funds that began in 2008 following the swift collapse of stock prices continued in the first half of 2010. Accordingly, the Company has received a total amount of \$0.5 million since the beginning of the year, and the fair value of the remaining shares as at June 30, 2010 amounted to \$0.3 million. In light of the events in 2008, the Company's asset allocation strategy no longer includes this asset class.

# Contribution generated by Other investments (in thousands of \$)

	Six months ended June 30, 2010	Six months ended June 30, 2009
Revenue	7,648	7,618
Gains (losses)	4,090	6,501
	11,738	14,119

Revenue consists of interest, dividends and trading activities related to Other investments. Interest income (primarily from bonds) is recognized at the bond rate in effect at the acquisition date. Realized gains (losses) are recorded at the date of sale and consist of the difference between proceeds on disposal and unamortized cost, regardless of the unrealized appreciation (depreciation) from prior years, which are reversed and reflected in unrealized appreciation (depreciation) for the current period.

Other investments continues to provide the Company with a major source of operating revenue even though interest rates are low. Other investments contributed \$11.7 million for the first six months of 2010 compared with \$14.1 million for the same period of 2009. Current revenue was comparable with the same period of 2009, the lower effective average interest rate in the bond portfolio being offset by a higher average bond balance. Lastly, in the first half of 2010, the Company recorded a gain of \$4.1 million on its Other investments portfolio. Despite the 25 basis point increase in the key rate announced by the Bank of Canada in June, reduced market expectations for interest rate increases in the future generated gains for the bond portfolio.

#### Capital raising

The Company offers its shares exclusively through the Desjardins caisse network. As at June 30, 2010, this distribution network consisted of some 430 Desjardins caisses and close to 870 service centres, totalling approximately 1,300 points of sale.

For any capitalization period, the Company may raise a maximum of \$150 million per period until it has reached at least \$1 billion in share capital for the first time by the end of a capitalization period. Beginning with the capitalization period following that, per period, the Company may raise the lesser of \$150 million and the amount of the reduction in share capital attributable to the Company's redemptions or purchases by agreement during the preceding capitalization period. Each 12-month capitalization period begins on March 1. A special tax is payable by the Company if it fails to comply with these limits, and control mechanisms have been implemented by the Company to ensure compliance. The 2009 issue reached the maximum allowable subscription of \$150 million.

Subscription of shares of the Company entitles the shareholder to receive a non refundable tax credit, which applies only to Québec tax, for an amount equal to 50% of all amounts subscribed, up to a maximum tax credit of \$2,500 per capitalization period. The minimum holding period for shares of the Company is seven years to the day from the date of purchase before the shareholder would normally be eligible for a redemption. Note however that shareholders who request a redemption to withdraw some or all of their shares after the seven year holding period may not claim a tax credit for any subscription for which the tax credit would apply in the current tax year or in any subsequent tax year. A total of \$109.7 million of capital was raised during the first six months of 2010 compared with \$84.1 million for the same period of 2009. The more favourable economic environment contributed to this advance. For the first half of 2010, redemptions totalled \$55.0 million compared with \$23.2 million for the first half of the previous year.

Since November 2008 when the first shareholders completed their minimum seven year holding period, close to 39% of the shares eligible for redemption have been redeemed. By the end of 2010, additional shares with an approximate value of \$34 million will become eligible for redemption, bringing potential redemptions to some \$236 million.

Equity 967.7	

\* Calculated at net asset value per share as at June 30, 2010

As at June 30, 2010, the Company had \$986.4 million in share capital consisting of 98,774,522 shares outstanding. The number of shareholders eased lower to 112,113 compared with 118,119 as at December 31, 2009.

The Company's policy is to reinvest its annual income from operations rather than pay dividends to shareholders in order to increase the capital available for investment in eligible entities and to create share value appreciation.

#### Operating expenses Expenses (in thousands of \$)

	Six months ended June 30, 2010	Six months ended June 30, 2009
Management fees	11,569	10,422
Other operating expenses	961	1,101
Shareholder services	778	783
Capital tax	325	98
	13,633	12,404

#### Management fees

The annual management fees paid to Desjardins Venture Capital Inc. amount to 2.5% of the Company's annual average assets' net value, less any amounts payable related to Investments impacting the Québec economy and Other investments. Management fees for the first half of 2010 amounted to \$11.6 million or 85% of total operating expenses, compared with \$10.4 million or 84% for the same period of 2009. As in the past, the management fees incurred by the Company are adjusted to avoid double billing as regards the Company's holdings in certain investment funds.

#### Other operating expenses

The decrease in Other operating expenses is due mainly to information system development expenditures. Under the management agreement, the Company incurred certain non-recurring fees related to information systems in the first half of 2009 to enable its manager to support the Company's growth and maintain quality services.

#### Shareholder services

The Company has appointed Desjardins Trust Inc. as shareholder registrar and share transfer agent. Desjardins Trust also acts as an intermediary for various shareholder support services. Since the Company began operations, Desjardins Trust has represented the largest component of the Company's shareholder service expenses.

The Company has entrusted the Fédération des caisses Desjardins du Québec with the activities related to the distribution of the Company's shares across the Desjardins caisse network. Other than reimbursing certain direct expenses, no commissions or other forms of compensation are payable to any person by the Company for distribution of its shares.

Shareholder service expenses for the first six months of 2010 are comparable to those of the same period a year earlier.

#### Capital tax and income taxes

The Company invests in securities eligible for a deduction for Québec capital tax purposes to minimize its tax expense while ensuring diversification and security in Other investments. The Company's capital tax expense is insignificant. Income taxes for the first half of 2010 amounted to \$2.6 million compared with \$1.0 million for the same period of 2009. In addition to current income taxes, future income taxes represent a major component of the Company's tax expense. Revenue type also has a significant impact since capital gains and business income are taxed at different rates.

#### Liquidity and capital resources

Cash flows from capital raising initiatives net of redemptions for the six month period ended June 30, 2010 totalled \$54.7 million (\$60.9 million for the same period of 2009). Operating activities generated liquidities of \$2.6 million, down in comparison with \$7.3 million for the same period in 2009. This variance is due mainly to income tax payments. The Company's investment activities resulted in cash outflows of \$39.5 million for the first half of 2010, compared with \$76.8 million for the same period of 2009. Cash outflows in Investments impacting the Québec economy amounted to \$29.8 million for the first half of 2010, compared with \$35.3 million for the same period of 2009. In accordance with the Company's asset management strategy, a portion of the excess liquidities generated by operating and financing activities was allocated to the Other investments portfolio, which posted net investments of \$33.1 million for the first half of 2010 compared with \$54.5 million for the same period of 2009.

As at June 30, 2010, cash and cash equivalents and money market instruments totalled \$101.9 million (\$109.1 million as at December 31, 2009). This cash level is maintained to cover redemption requests that might occur at a different pace than the issue of new shares and due to anticipated cash outflows related to the Investments impacting the Québec economy portfolio.

Since February 2010, the Company has had an authorized line of credit of \$10 million. In the event that liquidity needs exceeded expectations, this line of credit could be used on a temporary basis to cover the Company's obligations. This additional flexibility optimizes cash levels held and reduces the risk of having to dispose of assets hastily under potentially less advantageous conditions. The line of credit was not used during the first six months ended June 30, 2010.

Given the management approach for Other investments of matching the average maturity of the Company's total assets with the average maturity of its expected cash outflows, the Company does not anticipate any shortfall in liquidities in the short or medium terms and expects to be able to repurchase shares issued at least seven years earlier from those shareholders who make such a request.

#### **Recent events** *Reorganization of the manager*

In 2009, Desjardins Group reorganized a number of its business lines, including those of the Company's manager. The Company does not expect that this reorganization will have any significant effect on its operations.

#### Accounting policies

#### **International Financial Reporting Standards**

In 2008, the Accounting Standards Board of Canada (the "AcSB") confirmed that as of January 1, 2011, the International Financial Reporting Standards ("IFRS") would replace the Canadian generally accepted accounting principles currently in effect for certain companies, including public companies.

Adoption of IFRS in their current form would have significant effects for the Company, as it would have to begin consolidating the activities of certain portfolio companies.

As a result of comments received, the International Accounting Standards Board ("IASB"), the organization responsible for IFRS, in the first half of 2010 published an exposure draft proposing to amend current IFRS to exempt investment companies that meet certain criteria from the requirement to consolidate controlled investees.

Given the possibility that these amendments might not come into effect before the January 1, 2011 IFRS changeover date for Canadian companies, the AcSB in June 2010 issued an exposure draft to allow investment companies that currently apply Accounting Guideline AcG-18 *Investment Companies* to continue to apply existing Canadian standards in Part V of the *CICA Handbook - Accounting* until fiscal years beginning on or after January 1, 2012. The draft amendment should be completed in September 2010.

To address the possibility that the outcome of the current IASB and AcSB initiatives does not allow the Company to circumvent the requirement to consolidate certain investments as of January 1, 2011, discussions are underway with regulatory authorities to permit the Company to continue to issue its financial statements in accordance with amended IFRS.

The Company is still studying the effects of the new standards on the compilation and presentation of its financial statements. Throughout this process, the Company will benefit from the support and expertise of a specialized Desjardins Group team put together for the transition to IFRS, as well as assistance from external firms on certain matters.

#### **Related party transactions**

The Company enters into certain transactions with related companies in the normal course of business. These transactions are described in note 15 to the financial statements of the Company.

# Past performance

This section presents the Company's historical returns. These returns do not include the \$50 administration fee paid by shareholders or the tax credit they enjoy as a result of their investment. Past performance is not necessarily indicative of future returns.

#### Annual returns

The following chart shows the Company's annual returns and illustrates the change in returns from one fiscal year to the next for the past seven fiscal years and the six month period ended June 30, 2010. Annual return is calculated by dividing income (loss) per share for the year by the share price at the beginning of the year.

### Annual returns of the Company

\* Non-annualized return for the six-month period ended June 30, 2010.

# Compounded return of the share as at June 30, 2010

The compounded return is calculated based on the annualized change in the share price over each of the periods shown.

# **Management's report**

The Company's financial statements together with the financial information contained in this interim financial report are the responsibility of the Board of Directors, which delegates the preparation thereof to management.

In discharging its responsibility for the integrity and fairness of the financial statements, management has ensured that the manager maintains an internal control system to provide reasonable assurance that the financial information is reliable, that it provides an adequate basis for the preparation of the financial statements and that the assets are properly accounted for and safeguarded.

Furthermore, the Company's General Manager and Chief Financial Officer have certified that the method used to determine the fair value of each of the Investments impacting the Québec economy complies with the requirements of the Autorité des marchés financiers regulations and have confirmed the reasonableness of the aggregate fair value of the portfolio of Investments impacting the Québec economy.

The Board of Directors carries out its responsibility for the financial statements principally through its Audit Committee. The Committee meets with the external auditors appointed by the shareholders with and without management present to review the financial statements, discuss the audit and other related matters and make appropriate recommendations to the Board of Directors. In addition, the Committee meets with the Company's internal auditors. The Committee also analyzes the Management Discussion and Analysis to ensure that the information therein is consistent with the financial statements.

The financial statements present the financial information available as at August 19, 2010. These statements have been prepared in accordance with Canadian generally accepted accounting principles and audited by PricewaterhouseCoopers LLP.

The Board of Directors has approved the financial statements, together with the information in the Management Discussion and Analysis. The financial information presented elsewhere in this report is consistent with the Company's financial statements.

**Auditors' Report** 

### To the Shareholders of Capital régional et coopératif Desjardins

We have audited the balance sheets of **Capital régional et coopératif Desjardins** (the "Company") as at June 30, 2010 and December 31, 2009 and the statements of earnings, shareholders' equity and cash flows for the six-month periods ended June 30, 2010 and 2009. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Company as at June 30, 2010 and December 31, 2009 and the results of its operations and its cash flows for the six-month periods ended June 30, 2010 and 2009 in accordance with Canadian generally accepted accounting principles.

Notes to Financial Statements As at June 30, 2010 and December 31, 2009

(tabular amounts are in thousands of dollars, unless otherwise specified)

# 1 Governing statutes, mission, administration and investments

### Governing statutes and mission

Capital régional et coopératif Desjardins (the "Company") is constituted by an Act of the Québec National Assembly (R.S.Q. c. C-6.1) and is deemed to have been incorporated by the filing of statutes on July 1, 2001. The Company began its activities on November 5, 2001 and is a legal person with share capital whose mission is to:

- Raise venture capital for the benefit of Québec resource regions (Abitibi-Témiscamingue, Bas-Saint-Laurent, Côte-Nord, Gaspésie–Îles-de-la-Madeleine, Mauricie, Nord-du-Québec and Saguenay–Lac Saint-Jean) and the cooperative sector;
- Promote economic development in the resource regions through investments in eligible entities operating in those regions;
- Support the cooperative movement throughout Québec by investing in eligible cooperatives;
- Support eligible entities in their start-up phase and their development;
- Stimulate the Québec economy through investments in all parts of the territory of Québec.

### Administration

The affairs of the Company are administered by a Board of Directors typically composed of 13 members, as follows:

- Eight people appointed by the President of the Desjardins Group;
- Two people elected by the General Meeting of shareholders of the Company;
- Two people appointed by the above-mentioned ten members, selected from a group of people whom they deem to be representative of eligible entities as described in the Act;
- The General Manager of the Company.

### Investments

The Company may acquire minority interests, mainly in eligible entities, with or without a guarantee or security. Eligible entities include eligible cooperatives and partnerships or a legal person actively operating an enterprise, the majority of whose employees are resident in Québec and with less than \$100 million of assets and net equity of not more than \$50 million.

(tabular amounts are in thousands of dollars, unless otherwise specified)

The Company may invest up to 5% of its assets (as established on the basis of the last accountants' valuation) in the same eligible enterprise or cooperative, and the investment is generally planned for a period of five to eight years. This percentage may be increased to 10% to allow the Company to acquire securities in an entity operating in Québec but which is not an eligible entity. In such case, the Company may, directly or indirectly, acquire or hold shares representing up to a maximum of 30% of the voting rights, which can be exercised in all circumstances.

Pursuant to the Act, other investments may qualify, such as investments in certain investment funds, provided the required specific conditions set out in the Act have been met.

At the end of each fiscal year, the portion of the Company's investments in eligible entities, as well as other eligible investments which do not entail any security or hypothec and are made as first purchaser, must represent on average at least 60% of the average net assets of the Company for the preceding year. Furthermore, a portion representing at least 35% of that percentage must be invested in entities situated in resource regions of Québec or in eligible cooperatives. If these criteria were not met, the Company could be subject to penalties. As at December 31,2009, no amount was owing by the Company under these rules.

In its eligibility calculations, the Company also takes into account the investments it has made other than as first purchaser for the acquisition of securities issued by an eligible entity. For investments made prior to November 10, 2007, these investments should not represent more than one third of the total investments made by the Company as first purchaser in this entity. For investments made on or after November 10, 2007, this restriction is lifted, but the Company may not make investments other than as first purchaser totalling more than 20% of its net assets as at the preceding year-end for those investments to be eligible.

# 2 Significant accounting policies

### Use of estimates

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of assets and contingent liabilities at the balance sheet date and the reported amounts of revenues and expenses during the reporting year. The principal estimates are related to the determination of the fair value of investments impacting the Québec economy. Actual results could differ from those estimates. Those estimates are reviewed periodically and adjustments as they become necessary, are reported in earnings in the year in which they are known.

(tabular amounts are in thousands of dollars, unless otherwise specified)

### **Comprehensive income**

The statement of comprehensive income is not provided since net earnings and comprehensive income are the same.

### Investments impacting the Québec economy

### Listed shares

The investments in listed shares are recorded at their fair value. Fair value is established using the bid-side level at market closing on the balance sheet date when an active market is available. The value of the shares with trading or transfer restrictions is adjusted by a discount. The Company determines the amount of this discount based on the nature and duration of the restriction, the relative volatility of the share's performance, as well as the importance of the interest held in the overall float of outstanding shares and the volume of trades. Otherwise, the fair value may be established using unlisted share valuation techniques.

### Unlisted shares, debentures and advances

Unlisted shares, debentures and advances are valued at their fair value, determined in accordance with appropriate methods of valuation, primarily including comparison to arm's-length transactions or takeover bids and the capitalization of representative earnings before interest, taxes, amortization and capitalization or discounting of cash flows.

Significant assumptions used in the determination of fair value may include the discount or capitalization rate, the rate of return and the weighting of forecasted earnings.

### Sureties

When it is likely that an amount will be disbursed by the Company in relation to a pledged surety, the amount to be recognized in liabilities is estimated using an asset-based approach and a liquidation value method.

### Other investments

Other investments consist of temporary investments, bonds, preferred shares, foreign exchange contracts and units of funds of hedge funds recorded at fair value. Units of funds of hedge funds are recorded at fair value estimated by their respective managers at the balance sheet date. The foreign exchange contracts are measured using the difference between the contract's rate and the rate of an identical contract (same maturity and notional amount) that would have been agreed to at the balance sheet date. For all other investments, fair value is calculated according to market value, which is the bid-side level at market closing on the balance sheet date.

(tabular amounts are in thousands of dollars, unless otherwise specified)

Obligations related to securities sold short

Securities sold short as part of trading activities, which represent the Company's obligation to deliver securities sold which were not owned at the time of sale, are recorded as liabilities and are carried at fair value measured using the sell-side level at market closing on the balance sheet date. Realized and unrealized gains and losses thereon are recorded in revenue in Interest.

Securities purchased under resale agreements and securities sold under repurchase agreements

The Company enters into short-term purchases and sales of securities with simultaneous agreements to sell and buy back those securities at a specified price and on a specified date. Those resale and repurchase agreements are accounted for as collateralized lending and borrowing transactions, and are recorded on the balance sheet at the reselling or repurchase price specified under the agreement. The difference between the purchase price and specified reselling price and the difference between the selling price and the specified repurchase price are recorded using the accrual method in Interest.

### Cash, cash and cash equivalents, accounts receivable and accounts payable

Cash consists of bank balances. Cash and cash equivalents consist of cash and short-term deposits with original terms to maturity of three months or less.

The fair value of accounts receivable, cash and accounts payable approximates their carrying value given their current maturities.

### Software

Software is recorded at cost and amortized on a straight-line basis over a period of three years.

### Foreign currency translation

Monetary assets and liabilities denominated in foreign currencies are translated into Canadian dollars at the rate of exchange in effect at the balance sheet date. In the statement of earnings, realized or unrealized gains or losses on investments are presented under Gains and losses on investments.

For the other assets and liabilities denominated in foreign currencies, the changes related to foreign exchange rates are presented under Other operating expenses.

Revenues and expenses denominated in foreign currencies are translated at the exchange rate prevailing on the transaction date.

# **Capital régional et coopératif Desjardins** Notes to Financial Statements

As at June 30, 2010 and December 31, 2009

(tabular amounts are in thousands of dollars, unless otherwise specified)

### **Income taxes**

The Company uses the liability method in accounting for income taxes. According to this method, future income taxes are determined using the difference between the accounting and tax bases of assets and liabilities. The tax rate in effect when these differences are expected to reverse is used to calculate future income taxes at the balance sheet date. Future income tax assets are recognized when it is more likely than not that the assets will be realized.

### **Revenue recognition**

Interest and dividends

Interest is recorded on an accrual basis when collection is considered probable. Dividends are recorded as at the holder-of-record date and when they are declared by the issuing companies.

Administrative charges

Membership dues are recorded at the time of a shareholder's initial subscription and on the closure of that shareholder's last account.

Negotiation fees

Negotiation fees are recorded when the service is performed and when collection is considered probable.

Gains and losses on investments

Gains and losses on disposal of investments are recorded at the date of sale and represent the difference between the sale proceeds and the unamortized cost, without taking into consideration the unrealized gain (loss) recorded in previous years, which is reversed and taken into account in change in unrealized gain (loss) for the year.

### Premiums and discounts

Premiums and discounts on fixed-term maturity of other investments are amortized using the internal rate of return method up to the maturity date of these investments. Amortization of premiums and discounts are recorded in Interest.

Notes to Financial Statements

# As at June 30, 2010 and December 31, 2009

(tabular amounts are in thousands of dollars, unless otherwise specified)

### **3** Investments impacting the Québec economy

<sup>1</sup>Money market instruments consist of term deposits, Treasury bills or strip bonds with an original maturity of less than a year. As at June 30, 2010, all money market instruments have an original maturity of zero to ten months while as at December 31, 2009, they all had an original maturity of six to eleven months.

<sup>2</sup> Foreign exchange contracts to sell USD 56.6 million have three-month maturities (USD 43.8 million as at December 31,2009)

<sup>3</sup> The fund of hedge funds is in the process of orderly liquidation.

<sup>4</sup> Substantially all bonds are fixed-interest rate issues.

All portfolio securities of other investments are denominated in Canadian dollars except foreign exchange contracts.

Notes to Financial Statements

As at June 30, 2010 and December 31, 2009

(tabular amounts are in thousands of dollars, unless otherwise specified)

### 5 Securities sold short, resale agreements and repurchase agreements

As at June 30, 2010, obligations related to securities sold short consisted of federal bonds with a par value of \$6.0 million, bearing interest at a nominal rate of 3.67% and with a maturity of more than five years.

The resale agreements to which the Company is party expire in July 2010. The assets pledged as surety in respect of these agreements are the same securities as in respect of obligations related to securities sold short (no obligations related to securities sold short or securities purchased under resale agreements as at December 31, 2009).

The repurchase agreements to which the Company is party expire in July 2010. As at June 30, 2010, securities pledged as surety in respect of these agreements consist of federal and provincial bonds recorded in Other investments with a total par value of \$59.8 million, bearing interest at an average nominal rate of 1.40% and with a maturity of more than four years (no securities sold under repurchase agreements as at December 31, 2009).

# 6 Accounts receivable

	As at June 30, 2010 \$	As at December 31, 2009 \$
Interest and dividends receivable on investments	5,847	5,502
Sales taxes receivable	469	391
Amounts receivable on disposal of investments	2,169	541
Other accounts receivable	354	432
	8,839	6,866

# 7 Line of credit

Since February 2010, the Company has had an authorized line of credit of \$10 million. This bank credit bears interest at the operating credit rate of Caisse centrale Desjardins plus 0.5%. This line of credit is guaranteed by a portion of the money market instruments and bonds recorded in Other investments and is renewable on an annual basis. As at June 30, 2010, no drawings had been made on the line of credit.

Notes to Financial Statements

# As at June 30, 2010 and December 31, 2009

(tabular amounts are in thousands of dollars, unless otherwise specified)

### 8 Accounts payable

	As at June 30, 2010	As at December 31, 2009
	\$	\$
Suppliers and accrued liabilities	786	866
Other accounts payable	1,327	6
	2,113	872

## 9 Shareholders' equity

### Share capital authorized

The Company is authorized to issue common shares and fractions of common shares without par value, participating, voting, with the right to elect two representatives to the Board of Directors, redeemable under certain conditions provided in the Act, so that its capital increases by a maximum of \$150 million annually.

As of the capitalization period following the one at the end of which the Company first reaches capitalization of at least \$1 billion, the Company may collect, per capitalization period, the lesser of \$150 million and the amount corresponding to the reduction in paid-up capital attributable to all the shares and fractions of shares redeemed or purchased by agreement by the Company during the preceding capitalization period.

Each capitalization period, which lasts twelve months, begins on March 1 of each year. The maximum the Company can raise in the capitalization period ending on February 28, 2010 is \$150 million. As at June 30, 2010, the Company is in compliance with this limit.

Share capital issued and fully paid

	June 30,	December 31,
	2010	2009
	\$	\$
98,774,522 common shares		
(December 31, 2009 – 93,142,217)	986,437	933,533

(tabular amounts are in thousands of dollars, unless otherwise specified)

During the period, the Company issued 11,300,930 common shares (during the year 2010 - 13,519,588) for a cash consideration of \$109.7 million (during the year 2009 - \$129.4 million).

During the period, the Company redeemed 5,668,625 common shares (during the year 2009 - 5,536,806) for a cash consideration of \$55.0 million (during the year 2009 - \$53.3 million).

These data do not include the redemption requests made within 30 days of subscription.

The contributed surplus results from the excess of the shares' issuance price over the price payable for their repurchase.

### **Redemption criteria**

The Company is bound to redeem a whole common share or a fraction of a common share in the following circumstances:

- At the request of the person who acquired it from the Company at least seven years prior to redemption;
- At the request of a person to whom it has been devolved by succession;
- At the request of the person who acquired it from the Company if the person applies to the Company therefor in writing within 30 days of subscribing it;
- At the request of a person who acquired it from the Company if that person is declared to have a severe and permanent mental or physical disability which makes this person incapable of pursuing his or her work.

Moreover, the Company may purchase a common share or a fractional common share by agreement in the cases and to the extent permitted by a policy to be adopted by the Board of Directors and approved by the Québec Minister of Finance.

The redemption price of the common shares will be set twice a year, at dates that are six months apart, by the Company's Board of Directors on the basis of the Company's value as determined in the audited financial statements.

Notes to Financial Statements As at June 30, 2010 and December 31, 2009

(tabular amounts are in thousands of dollars, unless otherwise specified)

## Tax credit

The purchase of shares of the Company entitles the investor to receive a non-refundable tax credit, for Québec tax purposes only, for an amount equal to:

For purchases prior to March 24, 2006: 50% tax credit, \$1,250 maximum.

For purchases from March 24, 2006 to November 9, 2007: 35% tax credit, \$875 maximum.

For purchases subsequent to November 9, 2007: 50% tax credit, \$2,500 maximum.

Investors who withdraw some or all of their shares as part of a redemption after a seven-year holding period will not be able to claim the tax credit for any purchase for which the tax credit could be applied in the same or subsequent taxation years.

# 10 Capital disclosures

The Company's objective with respect to capital management is to ensure the availability of sufficient cash resources to fund investments in line with its mission and meet shareholders' demands for share repurchases. The Company's capital consists of shareholders' equity.

The Company is not subject to any external capital requirements other than those governing the issuance and repurchase of its shares, as indicated in note 9.

The Company's policy is to reinvest the annual revenue generated by its operations and not to pay dividends to its shareholders, with a view to increasing the capital available for investment and enhancing share valuations.

### 14 Cash flows

The changes in non-cash working capital items consist of the following:

	2010	2009
	\$	\$
Decrease (increase) in accounts receivable	(345)	1,250
Increase in income taxes receivable	(6,981)	(425)
Decrease in income taxes payable	(5,636)	(906)
Increase in accounts payable	1,241	3
	(11,721)	(78)

### 15 Related party transactions

The Company is related to Desjardins Group. Major agreements with the Company and Desjardins Group entities are as follows :

• The Company has entrusted the management of its operations, including management of its portfolio, to Desjardins Venture Capital Inc. ("DVC"), in accordance with the strategies and objectives approved by the Board of Directors. The management contract between DVC and the Company is effective for an initial term of ten years, unless the parties agree to terminate the contract by mutual agreement. Thereafter, the contract shall be automatically renewed for a five-year period unless either party decides to terminate the contract by giving written notice of at least 18 months.

Under this contract, the Company is required to pay an annual management fee equal to 2.5% of its annual average assets' net value reduced by any amount payable for the acquisition of investments. An adjustment is made to the management fee charged to the Company to avoid double billing relative to the Company's interest in some funds.

- The Company has appointed Desjardins Trust Inc. to act as its registrar and transfer agent with respect to shareholder transactions. The agreement has a three-year term starting on January 1, 2008.
- The Company has centralized custody services for its assets with Desjardins Trust Inc. The contract started on May 1, 2009 and has no predetermined ending date. Prior to the centralization, custody was shared between DVC, Desjardins Securities, Desjardins Trust Inc. and Caisse centrale Desjardins.
Notes to Financial Statements As at June 30, 2010 and December 31, 2009

(tabular amounts are in thousands of dollars, unless otherwise specified)

• The Company has appointed Fédération des caisses Desjardins du Québec to distribute its shares through the Desjardins caisse network. This agreement is effective for one year and will be automatically renewed each year under the same terms and conditions unless one of the parties gives written notice to the contrary three months before the expiry date of the agreement.

The Company entered into transactions with other Desjardins Group entities in the normal course of business. All of these transactions are measured at the exchange amount. The transactions and balances are detailed as follows:

#### 16 Financial instruments and associated risks

#### **Financial instruments**

The Company's financial instruments are recorded at their fair value. Fair value is used to determine the values at which these instruments could be traded in a current transaction between willing parties. When these financial instruments are not traded in public markets, their fair value is established based on a set of predetermined criteria, which minimizes the subjectivity of the valuation. The Company categorizes its financial instruments according to the three following hierarchical levels:

- Level 1 Measurement based on quoted prices (unadjusted) in active markets for identical assets and liabilities;
- Level 2 Valuation techniques based primarily on observable market data; and
- Level 3 Valuation techniques not based primarily on observable market data.

The following table shows the breakdown of the fair-value valuation of the financial instruments among the three levels.

				2010
	Level 1	Level 2	Level 3	Total
	\$	\$	\$	\$
Investments impacting				
the Québec economy	4,698	-	400,384	405,082
Other investments	317,710	194,809	322	512,841
Cash	31,271	-	-	31,271

When fair-value valuations of interests in private companies are not entirely based on observable data, the estimates are qualified as Level 3. This takes into account that, beyond external variables such as interest rate levels, economic growth and income tax rates to name only a few, whose impacts are generally reflected in valuation, there are also internal variables which affect fair-value estimates. The valuation of interests is also dependent on information or factors that have a particular influence on a business (outlook, competition, human or financial resources, etc.).

While the goal of valuation is to rely as much as possible on observable data, the choice of relevant elements and their impact on establishing fair value is influenced by the judgment of the valuator. That being said, although another valuator looking at the same business might weigh certain specific factors differently, the impact on the overall portfolio will be marginal.

2010

### Notes to Financial Statements

## As at June 30, 2010 and December 31, 2009

(tabular amounts are in thousands of dollars, unless otherwise specified)

The following table presents the reconciliation between the beginning and ending balances of Level 3 for the six-month period ended June 30, 2010.

			2010
	Investments impacting the	Other	
	Québec economy	investments	Total
	\$	\$	\$
Balance – December 31, 2009	397,731	738	398,469

# Auditors' Report on schedule of cost of investments impacting the Québec economy accompanying the financial statements

To the Shareholders of Capital régional et coopératif Desjardins

On August 19, 2010, we reported on the balance sheets of **Capital régional et coopératif Desjardins** (the "Company") as at June 30, 2010 and December 31, 2009 and the statements of earnings, shareholders' equity and cash flows for the six-month periods ended June 30, 2010 and 2009.

In our audits of the financial statements referred to above, we also performed audit procedures on the schedule of cost of investments impacting the Québec economy as at June 30, 2010. This schedule is the responsibility of the Company's management.

In our opinion, this schedule presents fairly, in all material respects, the cost of investments impacting the Québec economy when read in conjunction with the Company's financial statements.
